BACKACHE IS A SIGN KIDNEYS NOT ACTING

Tells of a Simple Mixture to Relieve Backache and to Prevent Bright's Disease.
MANY WAIT TOO LONG

More people succumb each year to some form of kidney trouble than any other cause. The slightest form of kidney degeneration often develops into Bright's kidney disease, diabetes or dropsy. When either of these diseases are suspected the sufferer should at once seek the best medical attention possible. Consult only a good, first-class physician, leave patent medicines alone.

There are many of the lesser symptoms of kidney trouble which can be treated at home as stated by a well-known authority. For some of these, such as backache, pain in the region of the kidneys, weak bladder, frequency (especially at night), painful scaling and other urinary troubles, try the following simple home remedy. Fluid Extract Mandellon one-half ounce, Compound Kargon one ounce, Compound Syrup Sarsaparilla three ounces. These vegetable ingredients are harmless and can be obtained at any good prescription pharmacy and anyone can mix them by shaking well in a bottle. The dose for adults is a teaspoonful after each meal and again at bedtime.

There is no better general remedy known to relieve all forms of rheumatism either because it acts directly upon the kidneys and blood. It cleans the clogged-up pores in the kidneys so they can filter and strain from the blood the poisonous uric acid and uric matter which if not eliminated remain in the blood, decompose and give about the joints and muscular system causing the various symptoms of rheumatism.

Fluid Extract is nature's signal notifying the sufferer that the kidneys are not acting properly. "Take care of your kidneys," is now the physician's advice to his patients.

Marlborough Troubles All Settled, Says Family

LONDON, Feb. 2.—An authorized statement containing what the family wishes to say on the case of the Duke and Duchess of Marlborough was issued last night. It is as follows:
The difference between the Duke and the Duchess of Marlborough have been settled privately. The children will arrive at Marlborough House today and the Duke and Duchess and their children will proceed to the Continent next week.
This statement is intended, as it may be interpreted to mean that the Duke and Duchess have settled their differences and resumed the relations of husband and wife. The family expressly desires to let it stand as it is, without giving it further explanation.

MASKED BANDIT GAGS, TES AND ROBS WOMAN

PANTUCKET, R. I., Feb. 2.—The police and detective force are to-day searching every corner of this city and the suburbs in an endeavor to get clues to the murderer who late yesterday bound and gagged Mrs. Alfred Hildreth, thirty years of age, the highway of her home on Nubia street, and then carried away \$40, which had been hidden in a cigar box, and an amount of silverware.

The murder took place on the second floor of a three-story apartment house. The neighbors on the upper and lower floors were away yesterday afternoon. About a half past five, Hildreth stepped out of her apartment into the hallway.

Handkerchief as a Mask.
She was grabbed by a man who wrote on his face a black ink handkerchief. He struck her on the side of her head and gagged her. When she was gagged, she was bound with ropes and gagged with a cloth. She was then carried away.

Had Ransacked Rooms.
By this time neighbors had arrived in the lower apartment. They refused Mrs. Hildreth's story. It was found that the thief had searched every closet and drawer. He took away the silverware and the cigar box. He also ransacked the rooms.

A Quotation for Our "Great Men"

Our Readers Will Instantly Recall SOME to Whom the
Quotation Applies

We all have tucked away in our heads certain sayings that we unspoke and exhibit from time to time, as a prefer unspoke and displays samples of his wares.

For your collection of extremely compact sayings we offer you fifteen words written by Balzac. Balzac was different from most writers. He studied for years the art of writing before he offered anything to the public. The ordinary writer, especially in the newspaper business, offers things for years to the public before he begins to study the art of writing.

The extract from Balzac which we offer you was applied by him to a villainous banker of great wealth. It is taken from a book of which the title may be shortened to "Splendors of Misery."

Notice how well put together this sentence of Balzac's is:
"That creature thinks itself a great man because it does mean things with great capital."

After you have noticed how well the sentence is written, notice how true it is. "Just for variety," as the Apollo man says, we mention no names of creatures that think themselves great men because they do mean things with their money. You can supply the names. Unfortunately they occur only too readily to the mind.

You can supply the name of the man who, with more money than he can possibly use, cleans the port through the trust that controls gas.

You can supply the names of the men that sell impure food, and that must be prevented by law from poisoning those that have made them rich.

It is a very good sentence of Balzac's, is it not? Use it.

"Salome," Mr. Conried and General Grant

(The General Dog Was a
Well-Meaning Dog)

Mr. Conried, of the Metropolitan Opera House, brought from Europe an indecent performance called "Salome." To produce this opera it was necessary to outrage the religious feelings of all the people, since religious personalities, deeply venerated, were associated on the public stage with deepest infamy AND WITHOUT EVEN THE EXCUSE OF HISTORICAL ACCURACY.

It was necessary also in this performance to degrade a woman of talent, by compelling her to give in public an exhibition of such degradation as is absolutely inconceivable to the decent mind.

This newspaper and others expressed the public's feeling as regards "Salome." And those that control the opera, about Mr. Conried, decided, or tried to decide, that the offensive and indecent performance should be prohibited.

At this Mr. Conried expresses deep grief. He feels that splendid, noble, artistic action is unappreciated.

Only those intimately acquainted with General Grant, the famous mongrel dog of Fawcett, N. J., can ever know just HOW badly Mr. Conried feels.

General Grant was the kind of dog that would stay outside of a woodchuck hole all night if you asked him to. The mere suggestion that there was a woodchuck inside was enough to make him indifferent to hunger and fatigue.

General Grant spent his whole anxious, devoted life hunting for things. Usually he was appreciated.

But one day, it was the saddest in this honest dog's life, he brought home into the kitchen something that he had found. It was a dead cat, extremely dead, and the very worst kind of cat that could be imagined. It was the kind that when alive in the woods is about as offensive to human beings as Mr. Conried's "Salome" is to human decency.

General Grant couldn't see anything wrong in the dead cat that he had found. He hurried into the kitchen with it, his tail in the air, his forefeet lifted high, proudly. He held the charming discovery for a second, put it gently down on the floor, looked at the cook, and the cook's assistant and the boy that owned him with beaming eyes, that said plainly, "Please love it. I found it myself."

General Grant's treasure was thrown out of the kitchen with the tongs and subsequently buried. He was rebuffed in his efforts to bring it in again, and as long as he lived he never understood WHY they wouldn't love the dead polecat that he had found out in Latipet's woods.

Harry Director Conried is the General Grant of the Metropolitan Opera House. He cannot understand why the American people do not love that work of art which he brought proudly home to Broadway and Thirtieth street. He probably never will understand it; but that doesn't matter much, provided his beautiful offering is taken out and buried as was General Grant's.

It is announced that Mr. Conried will produce or continue to produce "Salome" at a theatre if he is not allowed to put it on the Metropolitan's boards again. It ought to be possible to prevent the performance of this indecent and offensive opera anywhere in this country.

Certainly no man's desire to make himself a little richer should be accepted as an excuse for offending the best sentiment of the community, outraging religious sensibility and degrading art all at the same time. Mr. Conried might better avoid the risk of incurring expense unnecessarily in the renting of a new theatre.

Ella Wheeler Wilcox

She Comments on the Federation of the World

From a Practical Railroad Man's Standpoint

By Ella Wheeler Wilcox

WALTER J. BARNETT, of San Francisco, member of the Society of American International Law, vice-president of the George Washington Pacific Railroad, and a man of brilliant mental endowments, has published a booklet on the federation of the world. It is worth quoting liberally from.

While the foregoing figures cannot in any case be considered exact, they are nevertheless so accurate as to indicate the magnitude of the benefit that would result from disarmament.

In addition to the above, the benefits of peace are many. The first is the saving of human life. The second is the saving of money. The third is the saving of time. The fourth is the saving of space. The fifth is the saving of energy. The sixth is the saving of power. The seventh is the saving of strength. The eighth is the saving of health. The ninth is the saving of happiness. The tenth is the saving of peace.

Mr. Barnett proceeds to give some very interesting figures and to draw some very natural conclusions as follows:

The expenditures by the nations of Europe for military and naval purposes in 1906 were \$1,500,000,000. In 1907 they were \$1,600,000,000. In 1908 they were \$1,700,000,000. In 1909 they were \$1,800,000,000. In 1910 they were \$1,900,000,000. In 1911 they were \$2,000,000,000. In 1912 they were \$2,100,000,000. In 1913 they were \$2,200,000,000. In 1914 they were \$2,300,000,000. In 1915 they were \$2,400,000,000. In 1916 they were \$2,500,000,000. In 1917 they were \$2,600,000,000. In 1918 they were \$2,700,000,000. In 1919 they were \$2,800,000,000. In 1920 they were \$2,900,000,000. In 1921 they were \$3,000,000,000. In 1922 they were \$3,100,000,000. In 1923 they were \$3,200,000,000. In 1924 they were \$3,300,000,000. In 1925 they were \$3,400,000,000. In 1926 they were \$3,500,000,000. In 1927 they were \$3,600,000,000. In 1928 they were \$3,700,000,000.
